Règles côté app mobile

- Envoyer `Authorization: Bearer <token>` sur les routes protégées.
- Garder et renouveler le `refreshToken`.
- Envoyer du JSON uniquement.
- Sur les `PATCH`, n'envoyer que les champs autorisés par l'API.
- Gérer proprement les codes 400, 401, 403, 409.
- Pour Apple Sign In, envoyer `idToken` et `nonce` si demandé.
- Pour les devices push, enregistrer le token à la connexion et le supprimer à la déconnexion.

- Pour la suppression de compte, appeler `DELETE /api/mobile/auth/account`.
